WALKABOUT

The WALKABOUT offers 15 lb. babies to 190 lb. adults, who cannot fully weight-bear and walk, the exciting opportunity of learning and strengthening normal gait patterns and their associated muscle groups.

The Walkabout is a posterior support, weight relieving gait-trainer, which gives dynamic, active support throughout the rise and fall of the pelvis during ambulation. It is hands-free and open to the environment.

Features

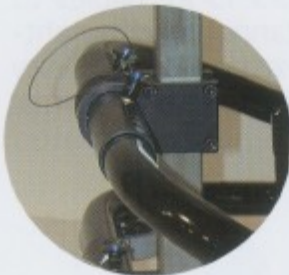

AIR SHOCK:
resistance can be adjusted with a simple air pump.

CRANK:
fine tunes the height of the body support.

DAMPING CONTROL:
Controls the rate of spring return.

TILT ADJUSTMENT CLAMPS:
enable the pitch to be set for the child, width adjustment pins; only on WALKABOUT 3 provides 6" width change.

UNICYCLE SADDLE SEAT:
position adjustable and padded.

TOGGLE BRAKES:
adjustable for wear.

LENGTH ADJUSTMENT:
5 inches of length adjustment.

NO-BACK BRAKES:
can be screwed down into position, which prevents the walker from moving backwards.

CASTER LOCK:
locks out swivels on front casters.

ANTI-TIPPER WHEEL:
needs to be min. of 0.5" above ground.
